

# Detecting Brown Dwarfs in Interacting Cataclysmic Binaries

April 2005 Update

Here's April's update. So far two of the three Brown Dwarf binary systems have been scheduled for observation the first week of May. The third object has yet to be scheduled.

Program: BD\_IN\_ICB

SCHEDULED TIME	AOT TYPE	TARGET NAME	AOR LABEL
-----	-----	-----	
may 04 2005 14:01:41.800	IracMap	gg leo	bd binary 2
may 05 2005 02:46:03.600	IracMap	v347 pav	bd binary

I've tried to arrange a time this summer for our group to meet, but so far we have not been able to come up with a common time. There are no additional workshops set up by anyone in my group since the March monthly update.
