

## **Observing Iron Stars with Spitzer**

### April Summary report of Iron Star Team Members

Steve Rapp had a workshop "Classroom Activities with Infrared Light" scheduled for Ap. 21 but had to postpone until May 5. Lauren and Beth submitted a proposal for NSTA next April with emphasis on infrared and Spitzer stuff.

The biggest goal/happening has been trying to coordinate a get together in Pasadena. We have not found a time. We are waiting to find out availability of data for XX Oph that was observed in Cycle 1.
